Q.No: 96	**In the passage below, certain words have been removed. Read the passage thoroughly and choose the most suitable option to complete each blank appropriately.** The domain of outer space, once a sublime expanse emblematic of universal aspiration, has morphed into a **(1)**____ terrain, rife with techno-nationalistic rivalries and juridical lacunae. As states and non-state actors alike pursue orbital hegemony, the narrative has shifted from exploration to securitization. The proliferation of constellations, kinetic kill vehicles, and cyber-vulnerable architectures has **(2)**____ erstwhile doctrinal separations between civilian and military enterprises. Multilateral compacts, such as the Outer Space Treaty, now appear **(3)**____ in the face of unilateral adventurism and semantic exploitation of treaty ambiguities. The ethos of cooperative multilateralism is steadily eclipsed by strategic opacity and regime fragmentation. Resource extraction from asteroids and prospective Mars colonization introduce a lexicon of planetary commodification, propelling a new phase of **(4)**____ governance, where legitimacy is brokered not by consensus but by technological primacy. Increasingly, legal constructs are subordinated to hardware capability, and soft power is reconstituted through launch cadence, orbital coverage, and downstream data monopolies. In this milieu, techno-diplomacy must evolve beyond hortatory platitudes to a **(5)**____ apparatus for strategic calibration, deterrence, and geopolitical signaling in an emergent multipolar cosmodynamic order. What should come in the place of blank number 1?
	sanctified
	labyrinthine
